Recent Speeches

St. Petersburg International Gas Forum, October 04, 2016: The current level of global energy prices makes it impossible to tackle those tasks of the global

economy that can be solved only with the help of gas. It means that in the very near future we will definitely witness an upward trend of energy price growth around the world.

Eastern Economic Forum 2016, September 02, 2016: Today, Gazprom is the world's leader in terms of natural gas production, as well as in terms of exports. The Company is the leading pipeline gas supplier. Our current projects are breaking new ground in the gas industry. The gas trunklines being built by Gazprom are the world's most advanced long-distance pipelines. I am pleased to note that we have reached an operating pressure of 120 atmospheres in the gas trunklines we construct.

Conference call marking Oil and Gas Industry Workers Day, August 30, 2016: Dear colleagues, let me wish you a happy Oil and Gas Industry Workers Day. We know perfectly well that our work is needed today and will be needed tomorrow. Every day, we put effort into providing people's homes with gas, electricity, and heat. I wish every single one of you a happy holiday. May you have good health, happiness, well-being, and – of course – further success in your work.

The annual General Shareholders Meeting of Gazprom, June 30, 2016: In 2015, Gazprom demonstrated that it was able to achieve good results even with low hydrocarbon prices. The Company managed to keep a fast pace in implementing production programs. We strengthened our resource base and ramped up our production capacities. We increased gas exports to Europe and oil production volumes. We confirmed the financial sustainability of our business and continued to work on large-scale projects.
